**DETAILED ACTION**

Claims 1 – 66 have been canceled. Claims 67 – 114 are pending.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 67, 70-73, 76-79, 83-85, 94-95, 101-106, 108-112, 114 are rejected under 35 U.S.C. 102(b) as being anticipated by Vacherand et al..

Vacherand et al., U.S. Patent No. 6,929,204 discloses a secure electronic device in which a sensor, 12, 13 or 14 in Figure 1, measures and outputs a value.

Comparators 15, 16 and 17 receive signals from the sensor. A protection device 20 is activated by logical device 21 to destroy all or part of the integrated circuit 10 based on output signals from the comparators 15, 16 and 17. The sensors 12, 13 and 14 are described as x-ray or ultra-violet sensors in column 4, lines 2 – 5. Other types of sensors are also described.

***Allowable Subject Matter***

Claims 96 - 100 allowed.

Claims 68-69, 74-75, 80-82, 86-93, 107-113 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Conclusion***

Matsumoto et al., U.S. Patent No. 6545371 discloses a semiconductor device with a light blocking film. A resistance detecting circuit detects when there is an attempt to remove the light blocking film. This detection results in a response that renders the semiconductor device inoperative or causes it to malfunction.

Farooq et al., U.S. Patent No. 7281667 discloses a tamper resistant integrated circuit.
